What we do

Business Partner of 

Currently Apex Systems is focusing on

- Diagnostic Imaging
- Critical care
- Healthcare Information Technology
- Consulting

And currently engaged in design development manufacturing and distribution of medical devices that includes in house manufactured devices and systems as well as white labeled products.

Our Innovation centre designed and developed one of the most advanced X-ray equipment Orthopantomography X-ray system right from drawing board to a successfully running model, performing well at number of leading diagnostic centers across India. One of the best design at a most competitive price.

Our Consulting wing – specialises in Healthcare infrastructure and are into green field projects and remodelling of existing hospitals / nursing homes.

We are building an extensive distribution network covering most of the South Asian and South East Asian region.

We are looking for bright and young candidates to add strength to our team.

OUR MISSION

World class products – Made in India – for domestic and global market.

APEX SYSTEMS Products are made in India and manufactured at different manufacturing facilities, located in various parts of the Sub-Continent of India

Critical Care, Patient Monitoring range, ECG, Holter, Stress Test, PFT, Defibrillator are manufactured at: NMEPL Pune and Parwanoo works

PACS and Healthcare IT Products at Innowave, Noida and Chennai

Orthopantomography X-ray System is manufactured at: TSIS Jaipur & FBD

Tele-Radiology & AERB Consulting Services – MIT, New Delhi

Modalities

PFT

STRESS TEST MACHINE - TMT

AMBULATORY BP

DIGITAL HOLTERS

1 / 3 / 12 Channel ECG

CLOUD BASED 12 Ch 7" Touch ECG

PC BASED 12 Ch ECG

We are pleased to inform you that we have option to offer Masimo SET® pulse oximetry technology in our products since our Manufacturing Unit NMEPL INDIA has technical collaboration with Masimo, USA

Patient Monitors

7" & 12.1" TFT COLOR DISPLAY Multi PARA – SpO2, ECG, NIBP, RESP, TEMP1, TEMP2, IBP1, IBP2, EtCo2

BIPHASIC DEFIBRILATORS – options of ECG, Resp, SpO2, NIBP, PACEMAKER and AED

RIS, PACS, Tele-Radiology, EMR , HIS & LIS

Freedom - Nano

PACS – 2TB

The freedom PACS Nano is a path breaking design based PACS which exploits the cloud computing and the availability off-the-shelf computer hardware to build an affordable, easy-to-use yet powerful PACS that delivers robust performance with comprehensive functionality.

Freedom Image sharing platform designed to be able to scale up from a small diagnostic center to large multi-specialty teaching hospitals .

comes with a standard capacity of 2 TB – 2TB storage in Freedom Nano is equivalent to over 7.0 TB storage in typical systems that do not offer image compression.

This capacity is adequate to provide over 3 years of images storage for a typical medium size diagnostic center

The simplicity of design also minimizes the cost and efforts for IT Administration, training and support, as even complex workflow involving multiple sites.

Freedom RIS

Freedom RIS is a **Radiology Information System**

designed to address the radiology workflow needs of an evolving organization.

The Freedom RIS enhances workflow with tight integration to Innowave Freedom PACS.

100% web-based architecture of freedom RIS makes it easy to deploy and manage at small and large institutions alike. The RIS can be deployed locally or on public cloud.

Freedom - Pico

Freedom Pico is a Radiology workflow solution – **Mini PACS** focussed on independent radiologist offering the abilities to:

- View DICOM Images from CT, MRI, CR, DR, US, XA etc.
- Microsoft Word based reporting engine for structured radiology reporting
- Store up to 10,000 cases online on built-in 1000GB storage
- Write DICOM CD DVD.

DICOM printing ·Teleradiology for home reporting or peer to peer consulting. (based on Prepaid Card)

ITDOSE Hospedia & Innopath

IT DOSE Hospedia is a complete web base ERP for Hospitals. ITDOSE Hospedia streamlines the treatment flow of a patient in the hospital, while allowing doctors and other staff to perform at peak performance **ITDOSE Innopath** has delivered LIMS solution worldwide.

Our solutions are tailored to manage the critical information across multiple laboratory facilities that optimize productivity and knowledge sharing across the healthcare organization.

TELERADIOLOGY Services

MIT Consultants has a team leading radiologists on its panel for professional reporting of MRI, CT & X-ray.

AERB Approved OPG ADVAPEX **DENTOPAN 10**
Latest Generation Orthopantomography X-ray System

OPG TMJ CEPH

CEPH arm attachment for LAT & AP views

The Latest State-of-Art LCD Digital Display
Micro-controller Technology based
(fully-automatic OPG-TMJ-CEPH modes)
Orthopantomography X-ray System
offers ultimate convenience to the operator with
27 preset Anatomical Programs
for consistent Image Quality
on all examinations:

OPG / TMJ / CEPH

and for all patient categories:

	Men	Woman	Child
Thin	◆	◆	◆
Medium	◆	◆	◆
Thick	◆	◆	◆

CSCT (Cervical vertebrae Shadow Compensation Technique) ensures desired penetration in hi-density cervical region for uniform, detailed information of complete Jaw with dose adjustment even in the hi-density cervical region.

CEPH attachment is optional. All specifications are same as that of without CEPH model.

RADIO-DIAGNOSTIC CENTERS preference goes with **ADVAPEX** OPG with CEPH. As all images OPG-TMJ-CEPH turns digital with the same CR & Hard Copy printer also adds to more footfall and better viability.

DENTAL CLINICS with small space can have **ADVAPEX** OPG without CEPH. As it fits in a small space of just 3ft x 3ft

LED Indicator for Radiation

Where we are located

APEX SYSTEMS' corporate office is located at **Bhikaji Cama Place**, New Delhi, INDIA. Named after the famous leader BHIKAJI CAMA, a lady of eminence and loyalty to Indian independence. Bhikaji Cama is the heart of South Delhi and within comfortable reach from Connaught place (10 kms) , IG International airport (15 kms) , Diplomatic enclave (0.5 kms) and VIP areas.

Our research and development wing - **the innovation centre** is located in New Delhi and other manufacturing units and partner firms for software and hardware development are located at different strategic locations of India.

Innovave Healthcare IT teams are located at Noida and Chennai.

Device manufacturing facilities:
TSIS (AERB approved X-ray plant) at RICOH, Jaipur in Rajasthan and Faridabad in Haryana.

NMEPL – for ECG, Monitors, TMT, Defibrillator, Holter, Ambulatory BP, etc. are manufactured at Parwanoo in H.P. and Pune in Maharashtra.
